DIRECTIONS

FOR GLASS WASHING

Use one ounce of KLEENSOLV to four gallons of water, if water is extremely hard, add more KLEENSOLV. For removing heavy accumulations of lime and iron stains use 4 to 6 ounces to gallon of water

CLEAN STAINLESS STEEL

Use three ounces to each gallon of water.

COFFEE URNS

Use one ounce to three gallons of water.

For removal of extra heavy accumulations of lime use equal parts of water and KLEENSOLV when lime is loosened brush clean. Always rinse well in clear water.
